

TWENTY-FIFTH
CELEBRATION

2012 **MDX**

ACURA
ADVANCE.

TWENTY-FIFTH
CELEBRATION

**THERE'S
25 YEARS OF
INNOVATION
IN EVERY
ACURA**

Acura is celebrating 25 years in Canada and a quarter century of driving innovation.

When you take the wheel of an Acura, you experience a legacy of precision engineering, outstanding performance and class-leading amenities.

Our commitment to excellence is matched by our commitment to Canadians. We've designed vehicles to meet the specific needs of Canadian drivers and have been manufacturing them in Canada since 1996 – the first luxury automaker to do so.

As we mark a quarter century in Canada, we invite Canadians to experience 25 years of innovation, and see for themselves that it's an achievement worth celebrating.

MDX A SPORT UTILITY TOUR DE FORCE

The 2012 Acura MDX — designed to perfection. Behold precision engineering and performance-inspired handling in its most stylish form. The ultimate sport utility vehicle, the MDX raises your expectations and heart rate with ease, as it empowers your every move with incredible power and grace.

STYLE

A modern masterpiece of perfectly designed proportions, the MDX is everything the ultimate sport utility vehicle should be. Its bold grille and chiselled hood accentuate its aggressive aerodynamic body style. A restyled headlamp and taillight design with sculpted front- and rear-bumper treatment enhances its wide confident stance. And from a 360-degree perspective, it embodies everything SUVs of the future should look like.

HIGH-INTENSITY DISCHARGE (HID) HEADLAMPS

In an MDX, you have the power to illuminate even the darkest roads with high-powered High-Intensity Discharge low-beam headlamps. Producing an intensely brilliant beam of focused light, HID headlamps enhance your ability to identify what's ahead. Plus, with built-in headlamp washers and available auto-levelling front headlamps with the Elite Package, you'll have a bright long-range outlook.

DUAL EXHAUST AND 19-INCH WHEELS

The large-diameter dual-outlet chrome exhaust hints at the powerful presence of the MDX's confidence-inspiring 300-horsepower engine. Plus, with available 19-inch aluminum-alloy wheels, the only thing you'll notice more than your newfound feel for the road will be the heads that turn as you drive.

LIGHT-EMITTING DIODE (LED) TAILLAMPS

From dawn to dusk, LED taillamps offer a brighter, safer way to let other drivers know you're braking, turning or passing. LED lights are extremely bright, long-lasting and are easier for other drivers to see at a distance, regardless of the outdoor or ambient lighting conditions.

POWER FOLDING SIDE MIRRORS

New for 2012, the MDX features power folding side mirrors that make getting into the tightest of parking spots a matter of convenience. With the simple push of a button, your side mirrors fold in to help you glide into a space between two cars or that last open spot in the parking garage.

DESIGN THAT BOLDLY GOES

THE FUTURE OF FORM AND FUNCTION

BLUETOOTH®-ENABLED HANDSFREELINK™

Program and link your Bluetooth-enabled wireless device to the MDX's HandsFreeLink mobile phone interface to make, receive and transfer calls without interruption or having to remove your hands from the steering wheel. Say the word and – provided your programmed mobile device is located inside the MDX cabin – calling numbers will be displayed, your phone will respond to voice activation and you will hear the caller's voice over the MDX's audio system. What's more, the system recognizes up to 800 verbal commands in either English or French and is capable of seamlessly integrating up to six different compatible phones, turning your MDX into a hub of connectivity.

BLUETOOTH-ENABLED AUDIO INTERFACE

Here's something you don't hear every day – all your favourite songs anywhere you want. With the MDX's available Bluetooth-enabled audio interface you can now bring your personal playlist along for the ride and, thanks to the latest in wireless connectivity, leave all those wires at home.

ACURA DVD ENTERTAINMENT SYSTEM

Now playing in the MDX Technology and Elite Packages is the available Acura DVD Entertainment System. Featuring a 9-inch LCD colour display, integrated remote control and wireless headsets with personal surround sound, passengers can pass the time watching movies or listening to their favourite CDs. Plus, an auxiliary 2nd-row audio/video input jack offers plug-and-play video game capabilities.

*Available with the MDX Technology and Elite Package.
†Includes a no-charge trial for 3 months, beyond which service fees apply.
Available in 10 Canadian provinces and 48 contiguous U.S. states.
See terms and conditions at www.xmradio.ca.

AVAILABLE ACURA/ELS SURROUND® PREMIUM AUDIO SYSTEM*

Top of the line never sounded so good. Unlike anything you've ever heard in an SUV, the Acura/ELS Surround 410-watt Premium Audio System with 10 speakers produces an enriched audio quality that rivals most professional recording studios. With DVD-Audio, AM/FM/XM® tuner, MP3/Windows Media® Audio compatibility, 15 GB hard disk drive (HDD) storage, DTS® and Dolby® Pro Logic™ II, you can experience your favourite music using the format of your choice. What's more, with the MDX's standard XM Satellite Radio tuner, you can subscribe to some of the best music the world has to offer, all from the comfort of your MDX cabin.†

AVAILABLE ACURA NAVIGATION SYSTEM WITH TRILINGUAL VOICE RECOGNITION™*

Talk about next-generation convenience. Utilizing satellite-linked GPS technology, the MDX can pinpoint your location almost anywhere in North America or access its search directory to help you find directions to those hard-to-find places. The system is equipped with trilingual Voice Recognition software and features real-time directions by voice or by moving-map display. Simply ask the system to show you the most direct route to your destination, offer an alternative route or, with the Zagat® Survey ratings, help you find a restaurant based on your choice of cuisine.

AUTOMATIC HUMIDITY CONTROL

Another first for the MDX, the automatic humidity control system uses electronic sensors to measure humidity based on cabin conditions. In the event of window-fogging conditions, the MDX compensates even before fogging occurs by automatically activating the heat/defrost mode, adjusting the fan settings and turning the air conditioning on or off.

TRI-ZONE AUTOMATIC CLIMATE CONTROL

Optimal cabin comfort is at hand. From cold winter mornings to hot summer nights, the synchronized tri-zone automatic climate control with air-filtration system keeps the zones for the driver, front passenger and 2nd-row passenger all at the desired temperature. And for extra seasonal comfort and luxury, the MDX offers standard heated front seats and heated 2nd-row outboard seats.

VERSATILITY

Space is never an issue. With so many innovative cargo and seating configurations, everything from golf clubs to groceries will find a home in the MDX. Featuring a 50/50 split flat-folding 3rd-row bench seat and a 60/40 split folding 2nd-row seat – versatility abounds. And for securing the occasional larger item, there are four conveniently located cargo area tie-down anchors.

STEALTH STORAGE

To keep your cabin clean and clutter-free, the MDX interior features a myriad of intelligent hidden-storage solutions. Up front there is a centre console with a spacious compartment to keep smaller items out of sight. This console also has a side storage compartment with a sliding cover. For hiding valuable items, there is a large lockable glove compartment and a concealed cargo well for storage in the back.

SPORTY LEATHER SEATS

Feel the difference ergonomically sculpted seating makes to your drive. From the two front seats to the comfort of the second row, tightly bolstered sumptuous seating with available premium perforated leather trim lends an air of modern distinction to the MDX cabin. Adding to the experience is a 10-way power-adjustable driver's seat including power-adjustable lumbar support and an 8-way power-adjustable front seat for the passenger. Plus, there's even a remote-linked 2-position memory system for the driver's seat, steering column, side mirrors, climate control and select audio functions.

LUXURY FOR SEVEN THAT'S MILES AHEAD

THE DRIVING FORCE OF ADRENALINE

3.7-LITRE, 24-VALVE, VTEC® V-6

In an MDX, driving performance comes to life in the form of a class-leading 3.7-litre, 24-valve, VTEC V-6 engine – one of the most powerful production engines Acura has ever built. From the lightweight aluminum-alloy block and cylinder heads to the computer-controlled Multi-Point Programmed Fuel Injection (PGM-FI®) system, the VTEC V-6 is compact, exceptionally fuel efficient and innovative to its spirited core.

HORSEPOWER AND TORQUE

MDX drivers will experience more exhilaration and more strength in numbers than ever before. Producing an awe-inspiring 300 horsepower at 6300 rpm and 270 lb.-ft. of purposeful torque at 4500 rpm, there's a virtually endless supply of power to meet your driving demands. Plus, with the added benefit of the Drive-by-Wire Throttle System™ you can always count on smooth engine response and efficient power delivery. When it comes to pulling power, the MDX is ready, willing and more than capable, with a 5000 lb. towing capacity. What's more, the MDX is a low-emission vehicle with a Tier 2 Bin 5 rating.

VARIABLE VALVE TIMING AND LIFT ELECTRONIC CONTROL (VTEC)

Before race-inspired VTEC engineering, engine tuning was a compromise between balancing low-end torque and high-end power. Utilizing two entirely different camshaft profiles enables VTEC engines to deliver amazingly responsive power across the full rpm range. At low speeds, the engine offers lower valve lift and a shorter cam profile opening, resulting in higher fuel velocities and greater low-end torque. But as your demand for speed increases, the engine switches to a cam profile with higher valve lift and longer opening duration, resulting in enhanced airflow and a huge boost in high-end rpm power.

MAINTENANCE MINDER SYSTEM

Instead of following a traditional kilometre-and-calendar maintenance schedule, the MDX instinctively monitors its own service schedule based on your driving habits. This advanced system takes into account engine revolutions, stop-and-go traffic experience and the frequency of short trips to determine when your next service visit should be. What's more, the system also anticipates oil and filter changes, tire rotations and other general maintenance.

TRANSMISSION

Smooth shifting and precision response are yours courtesy of the 6-speed automatic transmission with Sequential SportShift® mode and Intelligent Shift Control. Based on your driving conditions, electronic sensors ensure precision shifting between gears and optimal engine response by continuously monitoring the power required. Plus, Grade Logic Control helps you find the ideal gear for uphill, downhill or towing situations.

PADDLE SHIFTERS

For an incredible touch of performance, the MDX features a 6-speed automatic transmission with race-inspired paddle shifters. Precision-tuned for the MDX powertrain and intuitively mounted just behind the leather-wrapped steering wheel, these manual upshift and downshift paddle shifters make sitting idle behind the wheel a thing of the past, and adrenaline a thing of the future.

SUSPENSION

Enjoy an exceptionally smooth and familiar feel for the road with the MDX's performance 4-wheel independent front and rear suspension. From the crisp response of the MacPherson strut front suspension to the confident flat-cornering feel that comes from the multi-link rear suspension with body roll-reducing stabilizer trailing arms – the MDX is a dream to drive. Plus, experience added control and response from the variable power-assisted rack-and-pinion steering system that enhances your manoeuvrability in tight city scenarios.

ACTIVE DAMPER SYSTEM

Track-tested and tuned at Nürburgring, one of the world's most demanding racing circuits, the available Active Damper System complements the vehicle's fully independent suspension, providing you with a superior feel for the road and an extra boost of driving confidence and exhilaration. Designed to improve overall response and stability, the system changes the suspension-damper fluid viscosity in a fraction of a second based on driving conditions. The result is an increased damping firmness in each wheel, a decrease in body roll and vehicle pitch, and an exceedingly responsive, sportier ride.

**CONTROL MEETS
EXHILARATION
ON THE
OPEN ROAD**

SH-AWD

Super Handling All-Wheel Drive™ (SH-AWD®). Precision-tuned for the MDX, this exceptionally advanced all-wheel-drive technology helps you gain more traction in less-than-perfect conditions and provides you with the confidence to carve the perfect corner in every other condition.

THE SCIENCE OF CONFIDENCE

DURING STRAIGHT-LINE ACCELERATION

The groundbreaking SH-AWD system offers dramatically enhanced traction, control and acceleration in all weather or loose road conditions. Accelerate, and the system directs up to 70% of the engine's torque to the rear wheels to, in turn, deliver full power to the ground.

DURING A MODERATE CORNER

SH-AWD delivers a remarkably neutral steering feel as the rear wheels help generate cornering power. Electronic sensors monitor the speed and tightness of the turn and automatically vary torque to the outside cornering rear wheel, resulting in enhanced stability and driver control.

DURING ACCELERATION THROUGH A CORNER

Here, the advanced SH-AWD technology stands alone. The outside cornering wheel gets up to 100% of the rear-wheel torque and is accelerated to rotate faster than the inside cornering wheel, providing greater turning force and an incredibly stable corner line.

DURING STRAIGHT-LINE CRUISING

SH-AWD's sophisticated electronic controls automatically monitor road conditions and alternate torque from front to rear, as well as splitting rear-wheel torque from left to right. The result is a continuously smooth, stable ride, even in some of the worst road or weather conditions.

ADAPTIVE CRUISE CONTROL (ACC)

The available Adaptive Cruise Control (ACC) system allows you to set a time and distance interval between you and the car driving in front of you. During highway cruising simply engage the ACC, and the system will prompt you to choose a short, medium or long interval between you and the vehicle ahead. The system will then maintain the exact throttle speed and, if required, automatically apply moderate braking, to ensure a safe distance is maintained.

BLIND SPOT INFORMATION (BSI) SYSTEM*

An Acura first, the available blind spot information system provides you with information about vehicles that are in, or about to enter into, your blind spot when you're passing, being passed, merging or about to change lanes. Unlike some other systems that only detect objects at higher speeds, Acura uses a radar technology that detects objects travelling at speeds as low as ten kilometres per hour. An added measure of safety comes from the secondary alert indicators located in your Multi-Information Display (MID) area.

MULTI-VIEW REAR CAMERA*

Another safety first for Acura is the available multi-view rear camera that allows you to change your rearview camera image before, and while, you reverse. Based on your situation, the camera can show you a high-resolution wide view, normal view and top-down view of what's directly beneath your bumper. And for added perspective, the system can also display distance guidelines on your navigation screen to give you a better sense of the space behind your vehicle.

COLLISION MITIGATION BRAKING SYSTEM™ (CMBS®)

The MDX Elite Package model is now equipped with Acura's innovative Collision Mitigation Braking System (CMBS). Powered by a radar transmitter located behind the vehicle's front grille, this active safety system instinctively determines the distance and closing speed of the vehicle directly ahead of you.

1. RECOGNITION OF POSSIBLE COLLISION

If the closing speed exceeds a programmed threshold, the system warns the driver with audio and visual alerts.

2. SEAT BELTS TIGHTEN AND LIGHT BRAKING BEGINS

If no braking or speed reduction is detected, the system will gently pull the driver's seat belt and automatically begin light braking.

3. STRONG BRAKING

If all warnings have been ignored and the system determines an impact is unavoidable, strong braking is automatically applied to reduce the collision speed and mitigate the force of the collision.

THREE SAFETY FIRSTS

*Does not replace the driver's responsibility to exercise due care while driving.

At Acura, Safety Through Innovation is based on the idea that an advanced driving experience starts with advanced safety features. This guiding principle is reinforced through the extensive number of standard safety features and use of innovative technologies you'll find in all Acura vehicles.

2009 NHTSA: 5-STAR RATING FOR FRONT AND SIDE IMPACT

ACE™

The innovative Advanced Compatibility Engineering™ (ACE) body structure adopts a high-tensile, high-efficiency steel body structure to provide enhanced protection from a multi-directional collision. ACE reduces the concentrated force of a frontal impact by absorbing energy over a large area and dispersing it away from the occupants of the cabin. Additionally, ACE is designed to help reduce occupant injuries caused by misalignment in collisions between vehicles of different sizes.

VSA®

The advanced Co-operative Vehicle Stability Assist (VSA) system with Traction Control will automatically detect and correct understeer or oversteer situations, sometimes before you're even aware there's a problem. The system intuitively analyzes the conditions and then reduces throttle and/or applies braking to individual wheels. Should a loss of traction occur on a slippery surface, Traction Control will help compensate to get you safely underway.

ABS

The Anti-lock Braking System (ABS) helps maintain steering control when braking hard on wet, slippery or loose surfaces, while Electronic Brake Distribution (EBD) balances braking forces at each wheel to help compensate for cargo and passenger weight distribution inside the cabin. Plus, there is a Brake Assist feature that senses a panic stop and applies maximum braking power to help you stop quickly.

AIRBAGS

Maximum safety is achieved with six airbags designed to protect all occupants of the cabin. Depending on the point and force of impact, the MDX will deploy dual-stage, dual-threshold front airbags (SRS) that activate at one of two rates depending on the degree of impact; front side airbags with the innovative passenger-side Occupant Position Detection System (OPDS) that will not release if the system detects a small-sized or improperly positioned passenger; and side curtain airbags with a state-of-the-art rollover sensor. Plus, for the driver and passenger, active head restraints provide excellent neck protection in case of rear impact.

TIRE PRESSURE MONITORING SYSTEM

Correct tire pressure is critical to safety, performance and fuel efficiency. Enter the MDX's Tire Pressure Monitoring System (TPMS), which continually monitors the air pressure in each tire. If pressure drops in any of your tires, a transponder attached to the wheel's valve stem transmits the information to a receiver, and a warning appears on your instrument panel, indicating which tire requires attention.

REARVIEW/BACKUP CAMERAS*

Standard in the MDX is a backup camera with display in the rearview mirror. The MDX Technology and Elite Packages feature a multi-view rear camera in the navigation-system screen – a colour image of the area behind your vehicle is displayed conveniently on your screen. Even if the navigation system is turned off, the camera is activated automatically when you engage reverse.

*Does not replace the driver's responsibility to exercise due care while reversing. Government star ratings are part of the National Highway Traffic Safety Administration's (NHTSA's) New Car Assessment Program (www.safercar.gov). Model tested with standard side-impact airbags (SABs).

MDX

ENGINE	
Engine	3.7-litre, 24-valve, SOHC, VTEC® V-6
Horsepower	300 hp @ 6300 rpm
Torque	270 lb.-ft. @ 4500 rpm
Displacement	3664 cc
Redline	6700 rpm
Bore and stroke	90 x 96 mm
Emissions	Tier 2 Bin 5
Compression ratio	11.2:1
Multi-Point Programmed Fuel Injection system (PGM-FI®)	
Recommended fuel	Premium unleaded
Horsepower & Torque (SAE net Rev. 08/04, SAE J1349)	

DRIVETRAIN

6-speed automatic transmission with paddle shifters

Drive-by-Wire Throttle System™

Heavy-duty automatic-transmission cooler

Super Handling All-Wheel Drive™ (SH-AWD®)

Towing capacity: 2268 kg (5000 lb.)

CAPACITIES

Maximum cargo volume, 2nd- and 3rd-row seats folded down	2364 litres
Maximum cargo volume, 3rd-row seats folded down	1215 litres
Maximum cargo volume, behind 3rd row	425 litres
Fuel tank capacity	79.5 litres
Passenger volume	4015 litres
Windshield washer fluid tank	5.8 litres

SAFETY

At Acura, when innovation and performance meet purpose, remarkable things can be achieved. Through our commitment and continued involvement with events and organizations across Canada, we seek to create engaging and inspiring experiences for our customers and our community. Because at Acura we believe exhilaration goes beyond the driver's seat.

Acura has teamed up with W Hotels – a global luxury chain – to provide a fully loaded partnership that offers guests complimentary transportation in an Acura vehicle. The Whatever/Whenever® service gets guests where they need to go in advanced luxury and style.

The Canada Running Series includes a number of competitive running events across Canada that raise money and awareness for charities. We are proud to be the title sponsor of the Acura Toronto 10-Miler & 5K Run in support of the Canadian Cancer Society, an organization dedicated since 1938 to improving the lives of people living with cancer.

Acura is honoured to be the Canadian broadcast sponsor of golf's most historic and time-honoured tournament. The Masters is golf's first major open of the season and is famous for its ceremonial "Green Jacket" winner's presentation.

Driving a luxury vehicle should go beyond engineering and amenities. That's why Acura is committed to ensuring your ownership experience is equally luxurious. New Acura owners benefit from four-year 24-hour Roadside Assistance, which includes Dispatch Emergency Roadside Service, Emergency Lockout Service and Traffic Accident Services. See your Acura Retailer for details.

WARRANTY

Your new Acura vehicle comes with the following warranties: Major Component – 5-year/100,000-km limited warranty • Vehicle – 4-year/80,000-km Distributor's limited warranty • Rust Perforation – 5-year unlimited-distance warranty • Surface Corrosion – 4-year/80,000-km • Accessories – 4-year/80,000-km limited warranty (when installed by an authorized Acura Retailer at time of new vehicle delivery). Regular maintenance items and parts are subject to normal wear and replacement, and are not covered by warranty. Certain other items are excluded and certain conditions apply. See your Acura Retailer for details.

ACURA PLUS

Extend your worry-free ownership experience by purchasing additional coverage. Choose from Acura's flexible selection of Mechanical Coverage that extends up to 8 years or 200,000 km, whichever comes first. See your Acura Retailer for details.

LEASING AND FINANCING

Owning your Acura is easy. See your Acura Retailer for complete details on Conventional Financing.*
